33 - What did you like best about this course?

| Response Rate | 11/20 (55%) |
|---------------|-------------|
|---------------|-------------|

- I liked the ample opportunities for extra credit and test corrections.
- I like the workbook she used in the class
- How Professor Wang encouraged everyone to do their best and not be discouraged
- I loved how she used the external readings to supplement and bring to life what we were learning in class. She was always willing to answer questions and she tried to engage and challenge us but not to where we could not recover. It is clear she cares about the material and that makes us more interested in it too. She would also ask what topics related to health and medical care we were interested in (we said Medicaid access) and she dedicated a good portion of the class to it which was awesome. It was also clear she prepared a lot for these classes, as she was uploading things to canvas often and we had quick grade turn around. She also spent a lot of time making the workbooks which were really helpful. She's awesome.
- I enjoyed the class topic and the way it was taught. Professor was very clear and came prepared for class. Class workbooks help me stay organized and take notes efficiently.
- The supplement readings/articles; they made the textbook readings more interesting and were relevant to the topics we were learning, thus reinforcing understanding of those topics
- The professor, she was cool but also serious about the subject and the course
- I liked that professor Wang encouraged us to ask questions in class and to think about real-world applications of the material. The professor encouraged an in-depth understanding of the material, rather than just memorization of concepts and theories.
- the organization of this class was phenomenal, really well structured and encouraged the pursuit of knowledge
- discussions
- i liked how we were able to read thing outside of class and then discuss and apply them to what we were learning in class.

34 - How could this course be improved?

| Response Rate | 11/20 (55%) |
|---------------|-------------|
|---------------|-------------|

- This course could be improved if it was more interactive.
- NA
- Less lecture, but I still really liked it
- I don't think it could be.
- Perhaps designing slides with just the things we need to take note of. Sometimes writing on the board takes too long. However, I think drawing and explaining graphs and models on the board was most effective.
- More readings about healthcare policy would have made me like it more, but I understand that it is an Econ class. But applying micro principles to the healthcare market was not as interesting as some of the discussions/lectures. so less math more more ideas perhaps
- If extra credit is offered make sure that everyone is given a chance. Although the random name generator was used it still felt like some students were given more opportunities and then when they did not know they would just choose their friends, this doesn't give everyone the same chance of getting extra credit and can deter people from doing the readings because it can take a lot of time to do the reading and then see little payoff
- I think a bigger focus on policies and programs would add to the course. The theories covered helped with my understanding of the subject, but I felt like the best part of the course was that it added to my understanding of international healthcare systems.
- sometimes the amount of reading we had was overwhelming maybe provide less reading and only select the most impactful readings i wish we had started the project earlier because it is difficult to do a sufficient amount of research!
- more discussions on problems that are current regarding prescription drugs and how it jack's up overall healthcare for the population. ex. how valeant does exactly this and the problems associated with it. this topic could fuel students interest, perhaps to help control monopolies from charging a lot of money for profit at the expense of people's health in the future. this should spark more of an interested when talking about policy's and such
- NA

| 35 - Would you recommend this professor to a friend? Yes No Why or why not? | |
|---|-------------|
| XINTONG WANG | |
| Response Rate | 11/20 (55%) |
| <ul style="list-style-type: none"> • Yes, she cares about her students and wants them to succeed. • Yes, She cares about the students well being • YES • Yes, She is extremely helpful and always willing to help. She holds us to a high standard but also wants the best for us. She is very clearly and gets the points across clearly. • Yes, this professor was very supportive and kind. She responded to my emails very quickly and was very helpful and supportive during office hours. Her grading is also forgiving as you have the opportunity to test corrections as long as your are an active participant in class. Overall, I enjoyed having Professor Wang as the lecturer for this course. • For sure, she is cool and fair and taught me a lot • I think Professor Wang is a great professor. I wish she was staying at HWS for next year • Yes, she is engaging and clearly excited to help you learn. She explains concepts well and is especially helpful during office hours. I enjoyed Professor Wang's focus on real-world applications of the material. • yes • yes • Yes, I really liked her teaching style and felt it worked well for me. I think she is able to effectively communicate ideas to many students and is good at explaining things, that is why i would recommend her to a friend. | |
